HOW TO READ THIS RENDER (CONVENTIONS LEGEND)

struckthrough	struck in the manuscript (source: ~text~)
^{superscript}	scribal interlineation or raised letters (source: ^text^, m^r)
serif (Cambria) span	diplomatic text quoted inline (source: `text`); the type shift marks the source-text voice; conventions inside are rendered too
boxed serif panel	diplomatic transcription block
gray italic [...]	pass-annotation — editorial apparatus, NOT manuscript text
CONFIRM UPGRADE LEAN CONFLICT	delta-log verdict class: green = confirmed/convergent · blue = upgraded/new · amber = lean/open/variant · red = retraction/conflict
[?] / [...] / [] · « » · · △ ✓ eB X	sigla printed verbatim per methodology §6/§9

DELTA LOG — F. 82v VS BOTH BASELINES (COMPANION LL. 104–133 · NOTES §2 LL. 55–66; VERBATIM-IDENTICAL FOR THIS SIDE). CLASSES: A FORM · B SUBSTANCE · C NAMES · D APPARATUS.	19

Task #23 · opened 2026-07-09 · method: ../TRANSCRIPTION_AND_ANALYSIS_METHODODOLOGY.md v1.1 §12.1. First-hand paleography only. Diplomatic conventions per methodology §6 ([?] uncertain · {x} expanded · «...» interlineation · ✕ struck · || seam · / virgule · △/△△ · ✓eB · *pass-notes*).

Tiles: crops/hls_p4/crop_hls82v{L,R}_b1..8[_eB] — 32 tiles, cut 2026-07-09 with `../_crop_stac_v3.py` (replication-grade manifest rows in crops/hls_p4/_manifest.jsonl). Params: CROP_QUALITY=90 CROP_RENDER=nat,eB CROP_OVERLAP=0.25 CROP_SCALE=0; **L 0.02–0.55 / R 0.45–0.98 — VERSO, so the OUTER margin is the LEFT side** (marginalia side flips vs 82r; gutter is RIGHT; **no quire numeral expected** — the ink numerals "4"/"5"/"6" sit on recto top-rights); seam double-sighting zone 0.45–0.55.

COVERAGE PROOF (2026-07-09, `../_coverage_check.py`): ms149_f82v.jpg (W=2400 H=3536) · tiles considered: 32 · covered y: 0–3536 · x extent 48–2352 (0.020–0.980) · NO gaps > 12px within [0, 3536] — coverage proven for this x-window. **FIXITY:** crops/_FIXITY_SHA256_CROPS.txt refreshed 2026-07-09 (155 tiles).

Baselines (delta log cites BOTH): READING_COMPANION_ff81r-83v.md (f. 82v block, ll. 104–133; "As written" ll. 110–119) + `.../Immunity Notes/HLS_MS149_FLOYD_SECOND_ACCOUNT_TRANSCRIPTION.md` (§2 f. 82v, ll. 55–66). **The two baselines print VERBATIM-IDENTICAL text for 82v** — one quote block below covers both. Sole presentational difference: the Notes closes "They are ignorant of the Lawe —" with a trailing em-dash before its catchword note; the companion has none (apparatus-of-the-baseline, not a claimed MS reading). Legacy June native crops to reconcile THIS side: crop_H_82v_top_30L_griffith.jpg · crop_I_82v_coke_gravetts.jpg · crop_O_82v_nyne_sixty.jpg · crop_P_82v_averement_tail.jpg (ledger grep 2026-07-09: none separately documented — reconcile by direct read at eB phase; **NOTE: crop_I's filename says "gravetts" — a June label, not evidence; it does not weigh in q-82v-a).**

TOP ITEM — q-82v-a "Granetts" (GEOMETRY BEFORE PARSE ·   WISH-FULFILMENT GUARD BOTH WAYS · NAMES CLASS): baselines print Granetts[?] — flagged uncertain by the baselines themselves; Notes §4.18 records the **Garnet hypothesis** (referent = Henry Garnet, executed May 1606, prosecuted by Coke personally; "a Restoration copyist's metathesis of 'Garnetts' is the likely path" — *hypothesis, not asserted fact*). **The guard runs BOTH WAYS: the Garnet hypothesis pulls toward seeing "Garnetts"; baseline-conformity pulls toward the printed "Granetts". Neither pull is evidence.** Letterforms first. Adjudicate IN ORDER: (1) initial letter class (majuscule G — cf. atlas Gr-/Gar- row, collecting); (2) the r/ar ORDER after G (metathesis question: Gra- vs Gar- — where does the r sit relative to the a?); (3) the minim cluster before the terminal (e vs u: -ne-/ue- — atlas nn-exemplar "kynne" 81v.24 + e/u row are the comparators); (4) terminal -tts (double-t + s — cf. "pocketts" 82r.6). Also test single-vs-double n (Granetts/Grannetts). **eB regardless of nat confidence + legacy native crop_I reconciliation. Names above all → any variance vs the baselines' printed form = arbitration row, lean-grade disclosed.**

Other 82v q-items (from #19 survey + junction inheritance): 82v.1 catchword completion — expected "That William" (closes 82r's foot catchword That FIRM UNSTRUCK census row) · q-82v-b office token: survey sighted a Chancell^r-class superscript form vs baselines' spelled-out "Chauncellor" (¶9 "Lo: Chauncellor... greate Seale") — adjudicate abbreviation-vs-expansion from strokes; feeds the ARBITRATION #1 comparator family (caption Ch^r 81r.15) · "30" money form (baselines "30li [£30]"; cf. atlas money exemplar "fyned 20." 81r.10) · "60 sheets" (arabic digits expected; "fheets" long-*f*?) · **averem̄t abbreviation class ×2 expected** (¶8 "noe averement against a Judge after Judg^{m̄t}[?]" + ¶9 "Noe averement" — baselines print "averement" expanded, "Judg[men]t" bracket-expanded; watch for m-macron forms) · "Ignoramus" ¶2 (2nd instance after 82r.18) · "Juftice Barkers" possessive expected ¶5 (3rd body office token — ARBITRATION #1 comparator) · "Ch: Lo: Cooke" ¶16 opener (office abbreviation cluster — strokes carefully; cf. Ch^r arbitration) · ¶ census: baselines show 10 ¶s (9 virgule-terminated + final "They are ignorant of the Lawe" running to the catchword)

— test whether the all-line-broken-¶s structure (NEW on 82r) holds on the verso · **foot catchword expected: lowercase "that"** (→ 83r.1 "that will charge a Judge..."; baselines' note prints it lowercase — verify case + struck/unstruck from strokes).

BASELINE TEXT — F. 82v (BOTH BASELINES, VERBATIM-IDENTICAL)

That William Aprice received 30li [£30] to Murder one Griffith / The plts Brother was lately executed for Murder and Ignoramus found for the plt by speciall favour / Nyne wittnesses examined to prove the Murder / Seven howers spent in examinacon of the Murder / The bill conteyned 60 sheets, Noe Corruption layd to Justice Barkers charge / The Ch: Lo: Cooke affirmed this bill to bee ignorantly drawne And if the Court should admitt a proceeding uppon this bill Granetts[?] friends might alsoe call the Judge and Jury in question for his condemnacon & execucon / By the Comon Lawe in a case of this nature noe Judge can be questioned after Judgment & execucon nor any Juror for conspiracy / There is noe averement against a Judge after Judg[men]t / Noe averement against the Lo: Chauncellor for fixing the greate Seale to any thing / They are ignorant of the Lawe (*catchword: "that"; continues 83r*)

BAND BLOCKS (NAT SWEEP: L B1–8 → R B1–8; 1–2 READS/MSG; FLUSH PER BAND-PAIR)

L-b1 (nat, y 0–552) — read 2026-07-09 ¶flush 82v-F1¶

Top-LEFT corner of the verso: deckle/chipped outer edge LEFT (margin side flip confirmed); **NO quire numeral** anywhere in the band (as predicted — the ink numerals are recto-only). Outer (left) margin blank except one faint pale curl mark upper-left ¶tone matches offset/stain class, not ink marginalia — lean¶. Text enters at band foot:

82v.1 (L half)]

That William ⟨A⟩¶ *CATCHWORD COMPLETION CONFIRMED ✓✓: 82v.1 opens "That William", completing 82r foot catchword That (FIRM UNSTRUCK) — junction orderly; the 82r census row CLOSES. Display-scale swash-T "That" ¶-opener (same big-loop allograph as 82r .8/.12/.21 — atlas class ✓); "William" with the W lead-in loop (atlas W-class ✓).*

82v.2 (L half, partial at band foot)] to Murder ⟨on⟩e ¶ *display-M "Murder"; cut by band edge — re-sight at b2.*

- **STRUCTURE ¶open¶:** 82v.1 begins deep in the tile (≈x 0.27 src) — either a ¶1 indent or the verso text block sits further right than the recto's; resolve against b2–b8 line starts.

R-b1 (nat, y 0–552) — read 2026-07-09 ¶flush 82v-F1¶

Gutter side RIGHT confirmed (binding fold + facing-leaf edge at far right). Mirror-ghost show-through mid-band (normal for this leaf).

82v.1 (R half)]

¶illiam Aprice⟨/⟩ received 30^{li} *"Aprice" ONE GRAPHIC UNIT with majuscule A ¶lean¶ (matches 82r.1/.13 one-unit form; names class → eB QUEUED eB-82v-1: unit + the post-name diagonal mark ⟨pause-virgule|e-tail⟩ — cf. 82r.17 paired pause-virgules). MONEY FORM: 30^{li} superscript-ligature CONFIRMED at nat ✓ — digits +*

raised ^{li} (same class as atlas exemplar "fyned 20.^{li}" 81r.10); point-vs-no-point between digits and superscript *[[eB detail]]*. Line ends at the money figure.

82v.2 (R half, partial at band foot)] *[[<—> Griffith </> tall-ascender name partial at band edge; re-sight at b2.*

L-b2 (nat, y 332–994) — read 2026-07-09 *[[flush 82v-F2]]*

Overlap re-sight: **82v.1 That William** *[[✓✓ (swash-T display opener holds).*

82v.2 (L)] to Murder <one|and> <G> *[[△ the small word before "Griffith" is a DUAL at nat: open bowl (a/o-class) + minim pair + a third graph carrying an upper curl — d-loop would read "and", e-terminal reads "one" (baselines). The curl may equally be the G-lead-in sweep of "Griffith" crossing left [[substance-class if "and" — eB QUEUED eB-82v-2]].*

- **STRUCTURE RESOLVED (b1 open note):** line starts across this band sit at x≈0.28–0.31 src — that IS the verso text-block left edge (generous outer margin), not a ¶1 indent.

82v.3 (L)] The plts rot<her> *[[¶2 opener, display swash-T "The" (atlas class ✓); "plts" abbreviated p-descender + superscript-t cluster (cf. atlas "plt" 81r.10); majuscule B lower-loop lead-in.*

82v.4 (L)] for Murder<, > and *[[display-M "Murder"; low mark after it [[comma-form candidate — eB]].*

82v.5 (L)] the plt by <f>peciall *[[¶ "plt" abbreviated again; "fpeciall" long-f + p-descender (the fp cluster reads H-like at small scale — known ligature-look, not an H).*

82v.6 (L, partial at band foot)] Nyne wittnefses <e> *[[¶3 opener, display-N; "Nyne" y-form ✓ (baseline); [[tt + fs cluster — verify at b3 overlap]].*

R-b2 (nat, y 332–994) — read 2026-07-09 *[[flush 82v-F2]]*

Overlap re-sight: **.1 William Aprice</> received 30^{li} ✓✓** — post-name diagonal holds at 2nd sighting (pause-virgule candidate, eB-82v-1); **NO point visible between 30 and the raised ^{li}** at nat (contrast 81r.10 20.^{li} — point-vs-no-point to eB). Heavy mirror-ghost show-through mid-band (stronger on this side); gutter fold far right.

82v.2 (R)] *[[<one|and> Griffith / ¶1 terminator VIRGULE ✓; "Griffith" G majuscule big lead-in + ff medial (cf. Sheriffe ff-row); the dual small word double-sighted in the seam zone — curl on graph 3 present at BOTH sightings [[eB-82v-2]].*

- **STRUCTURE:** gap + line-break after .2 — the 82r all-line-broken-¶s pattern HOLDS so far on the verso.

82v.3 (R)] *[[rother was lately executed "executed" e-x cluster clear ✓.*

82v.4 (R)] *[[and Ignoramus found for "and" double-sighted in seam overlap ✓✓; "Ignoramus" 2nd instance (after 82r.18), tall I/J-class initial ✓.*

82v.5 (R)] *[[fpeciall favour / ¶2 terminator VIRGULE ✓; "fpeciall" double-sighted across seam ✓✓; "favour" ✓ (baseline spelling).*

82v.6 (R, partial at band foot)] *[[<e>xamined[?] to prove macron uncertain at nat; re-sight at b3 [[baselines print "examined" — abbreviation-class watch]].*

L-b3 (nat, y 774–1436) — read 2026-07-09 *flush 82v-F3*

Overlap re-sight: .5 the plt by ⟨f⟩pecia? ✓✓ · .6 Nyne wittnefses ? ✓✓. Outer (left) margin BLANK through the band; foxing spots at lower deckle edge.

- 82v.7 (L)] the Murder / ¶3 terminator VIRGULE ✓; SHORT line, gap after.
- 82v.8 (L)] Seven howers fpell ¶4 opener, display-S "Seven"; "howers" ✓ (baseline spelling); "fpent" long-f.
- 82v.9 (L)] the Murder / ⟨T⟩¶ ¶4 terminator VIRGULE ✓ MID-LINE, and ¶5 opens on the SAME line (swash-T lead-loop enters before the seam): STRUCTURE BREAK — the all-line-broken-¶s pattern (NEW on 82r) does NOT hold on 82v; this boundary runs on as 81r/81v did *structure delta — census + delta log*.
- 82v.10 (L)] 60 fheets⟨,⟩ Noe ¶ "60" arabic digits ✓+ "fheets" LONG-f CONFIRMED at nat (q-item closes pending eB corroboration); low mark after "fheets" *comma-form candidate, position matches baselines' printed comma — eB*; "Noe" ✓.
- 82v.11 (L, partial at band foot)] ⟨J⟩uftice ⟨B⟩arkers ¶ "Juftice" BODY OFFICE TOKEN #3, possessive construction — J-descender + long-f, spelled out again (ARBITRATION #1 comparator; re-sight b4).

R-b3 (nat, y 774–1436) — read 2026-07-09 *flush 82v-F3*

Overlap re-sight: .4 ? ⟨Ignoram⟩us found for ✓✓ · .5 ? fpeciall favour / ✓✓ (virgule holds).

- 82v.6 (R)] ¶⟨wittn⟩efses exa⟨min⟩ed to prove re-sight: the m/i/n zone is a plain minim run, macron NOT confirmed at 2nd nat sighting — downgraded to exa⟨min⟩ed *eB decides macron-vs-full*.
- 82v.7 (R)] ¶⟨Mur⟩der / tail re-sight ✓✓; short line confirmed.
- 82v.8 (R)] ¶⟨howe⟩rs fpent in examinac⟨o⟩n of "examinacon" fuller form (no clear macron at nat); medial ⟨c|r⟩ before "on" *atlas c-vs-t/r row — eB*; baselines print "examinacon" ✓-class.
- 82v.9 (R)] ¶⟨de⟩r / The bill⟨,⟩ conteyned run-on ¶ boundary DOUBLE-SIGHTED across the seam ✓✓ (virgule + swash-T "The" same line); small low mark after "bill" *comma candidate NOT in baselines — eB*; "conteyned" ✓ (baseline spelling).
- 82v.10 (R)] ¶Noe ⟨C⟩orruption layd to "Noe" double-sighted at seam ✓✓; "Corruption" majuscule-C *open-vs-closed-bowl variant check — eB/atlas*; "layd" ✓.
- 82v.11 (R, partial at band foot)] ¶⟨B⟩arkers charge / ¶5 terminator VIRGULE ✓; possessive "Barkers" no-apostrophe (period practice, matches baselines).

L-b4 (nat, y 1216–1878) — read 2026-07-09 *flush 82v-F4*

Overlap re-sight: .10 60 fheets⟨,⟩ Noe ? ✓✓ · .11 ⟨J⟩uftice ⟨B⟩arkers ? ✓✓ — "Juftice Barkers" office token #3 now double-sighted (J-descender + long-f FIRM at nat). Outer margin BLANK.

- 82v.12 (L)] The ⟨Ch|ff⟩: L⟨o|a⟩: ⟨C⟩oo¶ ¶6 opener; display swash-T with heavily BLOTTED head (ink-pool + spatter — same ink-load class as 82r.21, atlas ✓). THE OFFICE

CLUSTER IS A DUAL AT NAT **△△**: **⟨Ch|ff⟩**: — two tall strokes + colon; "Ch" needs round-C + h-ascender, "ff" needs parallel stems *[[office/names class → eB QUEUED eB-82v-3 REGARDLESS (q-82v-b family; feeds the ARBITRATION #1 caption-abbreviation comparator set)]]*. The vowel of L⟨o|a⟩: reads a-ish at this sighting *[[seam overlap re-sights it]]*.

- 82v.13 (L)]** to bee ⟨J⟩gnorant⟨ly⟩|| tall I/J-class initial where baselines print lowercase "ignorantly" *[[case-class, minor — note only]]*.

- **82v.11: {J}uifice {B}arkers ✓✓✓** (J-descender + long-f + majuscule B; office token #3, spelled-out possessive — ARBITRATION #1 comparator FIRM).
- **82v.13: tall I/J "Jgnorantly" ✓eB** (case-class minor delta vs baselines' lowercase).
- .14 the {C}ourt should — open-bowl C ✓ (atlas open variant) · .16 alfoe call the ✓✓.

R_b6_eB (y 2100–2762) — read 2026-07-09 *[/flush 82v-eB-F2/]*

- **82v.24 — q-82v-b RESOLVED AT eB: the long horizontal is an ABBREVIATION/SUSPENSION BAR, NOT a strike.** Geometry: the stroke rides ABOVE the x-height bodies of "auncell" (a-u-n-c-e untouched) and crosses ONLY the two I-ASCENDERS at about half their height — exactly where a suspension bar must pass when ascenders rise through its line. Contrast the hand's confirmed strikes (~~were~~/Lewes 81v.1): those cut THROUGH letter bodies at mid-x-height. → **Chauncell^r = bar + SUPERSCRIPT-r (3rd sighting, now eB grain) — a strongly abbreviated office form ✓eB. FORM-class (abbreviation-vs-expansion; baselines silently print expanded "Chauncellor") — NO strike emerged → NO arbitration (per the names rule's form-class carve-out). NEW COMPARATOR for ARBITRATION #1: genuine BODY superscript-r office abbreviation (cf. caption Ch^r 81r.15) — atlas row.** The initial C = CLOSED/D-like bowl with mid-bowl horizontal → **closed-bowl variant instance x6 (atlas row extends).** averem^t. compact + raised t + point corroborated at cut edge (3rd sighting).
- **82v.23: {J}udgm{t} / COMPACT CONFIRMED ✓eB** — m directly to crossed t, NO "en" material (the light horizontal above the mt zone = {macron|extended t-cross}, either way ABBREVIATED). **CONVERGENCE FIRM: baselines bracket "Judg[men]t" EXACTLY here — their brackets mark a real MS abbreviation.** ¶8 terminator virgule ✓✓.
- **82v.22: "averement" FULL at eB ✓eB** — complete "ment" tail material visible → the TWO instances genuinely differ: .22 full (≈baselines) vs .24 compact averem^t. (delta-log form item). "againft a" ✓✓.
- **82v.21: {con}spiracy / ✓✓✓** — long clear terminator virgule (¶7 END FIRM); ¶7→¶8 line-broken with gap (mixed structure holds).
- **82v.20 (R-half re-sight): full "ment" ✓✓ + open-oval ampersand #4 ✓✓ at eB.**
- **82v.25: the greate {S}eale to any ✓✓✓; the trailing diagonal = y-TAIL class lean** (minor dual CLOSES, conforms — no filler mark).

R_b2_eB (y 332–994) — read 2026-07-09 *flush 82v-eB-F2*

- **82v.1 (eB-1): "Aprice" ONE GRAPHIC UNIT + SINGLE p-descender ✓eB** (matches 82r.1/.13 one-unit form; NO double-p here — the .14 A(p)price variance stays isolated to 82r, ARBITRATION #3 unchanged). **Post-name diagonal = a DISTINCT stroke separate from the e-terminal → PAUSE-VIRGULE lean-firm ✓eB** (3rd function class, cf. 82r.17 pair; apparatus item NOT in baselines — minor delta). **30^{li}: NO POINT between digits and raised ^{li} ✓eB** (conforms baselines' "30li"; instance variation vs atlas "fyned 20.^{li}" 81r.10 — form detail).
- **82v.2 (R-half, eB-2 partial): DUAL ⟨one|and⟩ RETAINED** — the third graph's upper curl is PRESENT at this grain but its attribution is unresolved: d-loop back-curl (→ "and") vs "Griffith"'s large G lead-in sweeping up-left across the token (→ plain e, "one"). The G's lead-in is long and does reach the token's airspace. Direct comparator on the same tile: L4's unambiguous "and" (a-n-d, tall d-loop) — the L2 token's curl reads LESS tall than that d-loop *one-leaning hint, below grading threshold*. **L_b2_eB + native crop_H decide.** ¶1 terminator virgule after "Griffith" ✓✓✓.
- **82v.4 (R-half): "and (J)gnoramus found for" ✓✓ — Ignoramus #2 with tall I/J initial** (matches 82r.18 class).
- **82v.5: *speciall favour* / ✓✓✓ — ¶2 terminator long virgule FIRM.**
- **82v.6 (bottom partial): "examined" — NO macron seen at eB → plain lean** (conforms baselines; crop_O corroborates). .3 ⟨B⟩rother was lately executed ✓✓✓.

L_b2_eB (y 332–994) — read 2026-07-09 *flush 82v-eB-F3*

Outer (left) margin BLANK at eB; deckle edge clean.

- **82v.2 (eB-2, L-half): THE DUAL FLIPS TO "and"-LEANING ⚠** — at eB the token sits CLEAR of "Griffith"'s G (cut at tile edge with its OWN lead-in loop), so the third graph's upper curl belongs to the TOKEN; and that curl is a TALL BACK-LOOP — d-class in THIS hand (direct same-tile comparator: L4's unambiguous "and" two lines below — closely matching skeleton). Atlas logic: the hand's terminal-e is consistently SMALL ("drawne" .13, "Lawe" .27, "nature" .19); a tall back-loop is its d. → ⟨and|one⟩ and-leaning ⚠ — a SUBSTANCE-class variance vs BOTH baselines' "one" AND against grammar ("received 30^{li} to Murder and Griffith /" is awkward; "one Griffith" = "a certain Griffith" reads naturally) — my stroke-lean runs AGAINST the sense-pull, so the guard cuts BOTH ways here; DUAL RETAINED with disclosed lean. Native crop_H adjudicates; if unresolved → census carries the dual + delta log discloses both limbs.
- **82v.4 (L-half): post-"Murder" comma candidate DOWNGRADED** — the faint low tick is NOT confirmed at eB (could equally be Murder's r-finish); baselines print no comma → *hold ⟨r-finish|comma⟩ low-weight, NO census claim*.
- **82v.3: The plts ⟨B⟩rother ✓eB** — "plts" p-descender + superscript-t cluster with LONG t-cross extension (same light-horizontal habit as Judgm^t; form detail). ¶2 display-T head partially ink-loaded (same class as .12).
- **82v.5: the plt by *specia(l)* ✓✓✓ · 82v.6: Nynne wittnefses** — tt + fs cluster CONFIRMED at eB ✓✓ (b3 verify item closes). 82v.1 ⟨T⟩hat William display opener ✓✓✓.

L_b5_eB (y 1658–2320) — read 2026-07-09 *flush 82v-eB-F3; ADDED read — L-half items unreachable from R_b5_eB*

- **82v.15 (L-half): "vpon" THIRD SIGHTING ✓ at eB grain → FIRM** (angular v + single p-descender; delta vs baselines' "uppon" now nat ×2 + eB ×2).
- **82v.19: THE NATURE-MARK = COMMA-FORM , lean-firm ✓eB** — short + LOW (baseline zone), matching the atlas comma-class ("Jury, who" 82r.24 · "in," 82r.5), NOT the longer above-x-height pause-virgules (82r.17 pair; 82v.1 post-Aprice). Dual ⟨comma|pause-virgule⟩ RESOLVES → comma-form. **Apparatus delta (minor): baselines print no mark after "nature"**.
- **82v.20 (L-half): full "en" material VISIBLE → "Judgment" FULL ✓eB — DOUBLY CORROBORATED (both halves at eB); the men-zone dual is RESOLVED → full form, conforms baselines' ¶7 print.**
- **82v.18: "Comon" macron ABSENT at 2nd eB sighting → plain FIRM-lean; initial C reads CLOSED-bowl LEAN** *flush would be closed-variant instance ×7; hold lean at this grain*.
- Overlaps ✓✓✓: .14 the ⟨C⟩ourt should · .16 alfoe call the ⟨J⟩u⟨dge⟩ · .17 (L) queftion for his ⟨co⟩ · .21 (L) ⟨J⟩uror for conf⟨piracy⟩.

LEGACY-NATIVE RECONCILIATION (JUNE COLOR CROPS = ZOOM LAYER; READ 2026-07-09)

crop_H_82v_top_30L_griffith.jpg (L1–L6 zone) — *flush 82v-eB-F4*

- **82v.1: "That William Aprice⟨/⟩ received 30^{li}" — ALL ELEMENTS FIRM at native:** Aprice one-unit single-p ✓; post-name PAUSE-VIRGULE = a distinct separate slash → FIRM (nat ×2 + eB + native); 30^{li} no-point ✓ FIRM (conforms baselines).
- **82v.2 — THE DUAL AT NATIVE: the token closely matches the SAME-IMAGE "and" comparators** (L4 "and Jgnoramus", identical a + minims + back-loop skeleton), though its loop reads slightly flatter than L4's d. The e+ligature-toward-G alternative ("one" with lead-out) is NOT excluded. **FINAL: ⟨and|one⟩ and-LEANING** , **DUAL RETAINED at lean — substance-class variance candidate vs BOTH baselines' "one"; grammar favors "one"** ("one Griffith" = "a certain Griffith"; "and Griffith" is awkward) while strokes lean "and" — guard note: the stroke-lean runs AGAINST the sense-pull; census carries the dual, delta log = VARIANT (amber) with both limbs, surfaced to user. Sighting stack: nat ×3 (curl present), eB-L (d-class lean), eB-R (attribution open), native (matches and-skeletons, flatter loop).
- **82v.4: post-"Murder" low tick VISIBLE at native → comma-form , RE-UPGRADED to lean** (nat candidate + native; eB unconfirmed) *flush apparatus delta, minor — baselines print no comma; disclosed at lean*. "and ⟨J⟩gnoramus found for" ✓✓✓.
- **82v.3 The plts ⟨B⟩rother was lately executed ✓✓✓ · 82v.5 the plt by fpeciall favour / ✓✓✓** (partial at crop foot).

crop_I_82v_coke_gravetts.jpg (L10–L19 zone) — *flush 82v-eB-F4; filename label "gravetts" = June quick-look u/v misread of the minim cluster — superseded, weightless*

- **82v.15 — q-82v-a FOURTH-LAYER CONFIRMATION → "Granetts" FIRM. q-82v-a CLOSED.** All four elements at native color: (1) majuscule G FIRM; (2) r-BEFORE-a — "Gra-"; the metathesis order "Gar-" is NOT on the leaf at any layer (nat ×2, eB, native); (3) minim-pair joined at the TOP = n (not u/v) + clear e — the exact cluster the June labeler quick-read as "ve"; "Grauettts"/"Grannetts" excluded; (4) -tts double-

t + s FIRM. As-written = the baselines' PRINTED form — their "[?]" upgrades to FIRM; NO variance → NO arbitration. The Garnet TRANSMISSION hypothesis (Notes §4.18: exemplar's "Garnetts" metathesized by a copyist) is a claim about the exemplar, untouched by these strokes; settled here is only WHAT THIS LEAF WRITES. "friends" ✓; "migh(t)" — t-fragment left of the dark-brown ink pool (defect) ✓.

- **82v.12 — OFFICE CLUSTER READS ff: AT NATIVE → ARBITRATION #4 OPENED (office/names rule: variance vs baselines' printed "Ch:").** Decisive same-line comparator: "affirmed"'s ff-medial shows the IDENTICAL two-parallel-stem + loop-top skeleton; the cluster shows NO C-bowl (contrast open-C "Cooke"/"Court" same lines; closed-C "Chauncell" .24) and no h-bowl ("charge" .11 comparator). Stack: nat DUAL △△ → eB ff-lean → native ff-lean-FIRM. As-written: The ⟨ff⟩: L⟨o⟩: ⟨C⟩ooke △ (expansion unknown; possibly a copyist's mechanical miscopy of an exemplar "Ch:" — both are two-tall-graph clusters at speed — or the baselines normalized). Cross-ref ARBITRATION #1 (81r.15 caption Ch^r): adjudications run stroke-first in BOTH directions — there Ch-class was read FOR, here ff-class AGAINST. L⟨o⟩: vowel = small o at native → Lo: lean-firm (conforms). "Cooke affirmed this bill" ✓✓✓ FIRM.
- **82v.17 — ¶6 TERMINATOR: NOTHING after "execuc⟨o⟩n" at native → BARE ¶1-close FIRM (nat + eB + native) → CONFLICT delta FIRM vs BOTH baselines' "execucon /" (2nd instance of the omitted-terminator class after 82r.20 "tryall").** Open-oval ampersand ✓ at native (form ×2 at native grain — atlas).
- **82v.10: comma after "fheets" ✓ FIRM (eB + native; conforms baselines' printed comma).** "Corruption" C = CLOSED-bowl CONFIRMED at native → atlas closed-variant instance ×6.
- **82v.18: "Comon" PLAIN FIRM (no macron: eB ×2 + native); initial C closed-bowl lean-firm (eB lean + native lean) → atlas ×7-class with disclosed lean stack.**
- **82v.19: nature, comma-form FIRM at native (visible low tick) — apparatus delta FIRM: baselines print no mark.** "noe ⟨J⟩udge can be queftioned" ✓✓✓.
- **82v.13: tall-J "⟨J⟩gnorantly" FIRM at native (case-class minor delta vs baselines' lowercase "ignorantly").** "drawne And if" ✓✓✓.
- **82v.11 ⟨J⟩uftice ⟨B⟩arkers charge / ✓✓✓ FIRM (¶15 END; office token #3 sealed — ARBITRATION #1 comparator) · 82v.14 the ⟨C⟩ourt shoudl admitt a proceeding ✓✓✓ · 82v.16 alfoe call the ⟨J⟩udge and ⟨J⟩ury in ✓✓✓.**

crop_O_82v_nyne_sixty.jpg (L5–L10 zone) — *flush 82v-eB-F5*

- **82v.6: "examined" — NO macron at native → PLAIN FIRM (eB + native; conforms baselines).** "Nyne" FIRM · "wittnefses" tt+fs FIRM.
- **82v.8: examinac⟨o⟩n — medial graph reads c-class at native (low rounded bowl into -on); NO macron → fuller plain form ✓ (conforms baselines' "examinacon").** "Seven" display-S ✓ · "howers fpen" FIRM.
- **82v.9: RUN-ON BOUNDARY CONFIRMED AT NATIVE → STRUCTURE BREAK FIRM — mid-line Murder / + same-line swash-T The bill conteyned (¶4 END + ¶5 OPEN, one line). Post-"bill" low mark: small low tick visible at native → ⟨comma/point|ink spot⟩ LEAN only, disclosed — no firm claim (not in baselines).**
- **82v.5 the plt by fpeciall favour / ✓✓✓ · 82v.10 re-sealed ✓✓✓: 60 fheets, Noe ⟨C⟩orruption layd to (comma FIRM · closed-C Corruption FIRM · "layd" ✓).**

crop_P_82v_averement_tail.jpg (L18–L26 zone) — *flush 82v-eB-F5*

- **82v.24 — q-82v-b CLOSSES FIRM AT NATIVE:** the long horizontal again rides ABOVE the x-height bodies of "auncell" and cuts ONLY the ll ascenders → **suspension BAR (not strike) FIRM (eB + native)**; superscript-r clearly raised at word-end → **Chauncell^r FIRM**; averem^t. compact + raised-t + point re-confirmed FIRM. Initial C closed/D-like ✓. **FORM-class deltas (baselines silently expand "Chauncellor" / "averement"); NO arbitration — no strike anywhere in the token.**
- **82v.23: ⟨J⟩udgm⟨⟩t / COMPACT re-confirmed at native → CONVERGENCE FIRM** (baselines' "Judg[men]t" brackets mark the real abbreviation; virgule FIRM).
- **82v.22: "averement" FULL re-confirmed → FIRM.** The two-instance contrast is SEALED: .22 full / .24 compact.
- **82v.20: "Judgment" FULL FIRM at native (3rd layer);** open-oval & ✓ (3rd native-grain sighting — atlas form settled).
- **82v.18: "Comon" closed-bowl C FIRM at 2nd native sighting** (atlas closed-variant ×8); plain (no macron) FIRM.
- **82v.19: nature, re-sealed FIRM** (2nd native sighting).
- **82v.25: the post-"any" diagonal reads MORE slash-like at native → REOPENED to low-weight DUAL ⟨y-tail|line-end filler/pause-virgule⟩** (line-END position, ¶9 continues to .26; filler family 81r.10/81v.23/81v.16) — disclosed in census brackets only, no baseline mark.
- **82v.21 ⟨J⟩uror for conspiracy / ✓✓✓ FIRM** (tiny pre-virgule point = y-tail ambiguity, no claim) · **82v.26 thing⟨—⟩ partial at crop foot** (terminator carried by nat+eB ✓✓).

R_b8_eB (y 2984–3536) — read 2026-07-09 *flush 82v-eB-F6; ADDED read — catchword carried only nat ×2 and 81r taught that catchwords are sensitive*

- **FOOT CATCHWORD SEALED: that — lowercase, UNSTRUCK, foot-right ✓eB → FIRM (nat ×2 + eB).** Small plain t-h-a-t, low t-cross, no strike, no marks above/below (tiny tick under the a = the a's finishing link/speck, no letter value). Rest of band BLANK: clean bottom edge, deckle, gutter fold far right, NO quire numeral (verso geometry holds to the foot).

eB PASS + NATIVE RECONCILIATION COMPLETE (2026-07-09): eB tiles 6 (R_b5 · L_b4 · R_b6 · R_b2 · L_b2 · L_b5 + R_b8 catchword) + natives 4 (H/I/O/P). MB: 11 image reads this phase.

CENSUS — FIRM (F. 82v, 27 LINES + CATCHWORD; FINAL GRADES AFTER NAT ×2 + eB + NATIVE LAYERS)

- L1]** That William Aprice⟨/⟩ received 30^{li} *FIRM; catchword completion (82r junction CLOSED); pause-virgule after the name FIRM; 30^{li} no-point FIRM*
- L2]** to Murder ⟨and|one⟩ Griffith / *△ DUAL RETAINED, and-leaning *substance-class variance candidate vs baselines' "one"; delta log #3**

¶ CENSUS — **FIRM**: 10 ¶s (= baselines). Terminators: virgules **FIRM** on ¶1 ¶2 ¶3 ¶5 ¶7 ¶8 ¶9 + ¶4's MID-LINE at L9; ¶6 BARE (**CONFLICT** **FIRM**); ¶10 runs to the catchword (no terminator expected). **STRUCTURE: MIXED FIRM** — all boundaries line-broken with gaps EXCEPT ¶4→¶5 run-on at L9.

DELTA LOG — F. 82v vs BOTH BASELINES (COMPANION LL. 104–133 • NOTES §2 LL. 55–66; VERBATIM-IDENTICAL FOR THIS SIDE). CLASSES: A FORM • B SUBSTANCE • C NAMES • D APPARATUS.

1. **CONFIRM** — **C/names: q-82v-a "Granetts" FIRM; the baselines' own "[?]" flag upgrades:** as-written = the baselines' printed form at four layers (nat ×2 · eB · native crop_l): majuscule G · **r-BEFORE-a** · single TOP-joined minim-pair + e · terminal -tts. The metathesis order "Gar-" is not on the leaf at any layer; "Grauettts"/"Grannetts" excluded by the cluster geometry. NO variance → no arbitration (names rule satisfied by conformity). The Notes-§4.18 Garnet TRANSMISSION hypothesis (a copyist metathesizing an exemplar's "Garnetts") concerns the exemplar, not this leaf — untouched by these strokes. June crop_l's filename "gravetts" = a u/v quick-look misread of the same cluster, superseded.
2. **VARIANT** — **△△ ARBITRATION #4 (C/office): L12 cluster reads ff: where BOTH baselines print "Ch:"**: two parallel loop-top stems + colon = this hand's ff skeleton, sealed by the SAME-LINE comparator "affirmed" (identical stems); no C-bowl (contrast "Cooke"/"Court" open-C, "Chauncellr" closed-C), no h-bowl (contrast "charge" L11). Stack: nat dual △△ → eB ff-lean → native ff-lean-firm. As-written: The ⟨ff⟩: L⟨o⟩: ⟨C⟩ooke — expansion unknown; plausible paths: copyist mechanically miscopied an exemplar's "Ch:" (both are two-tall-graph clusters at speed) OR baselines normalized to the expected office. Office/names rule → arbitration row regardless of lean. Cross-ref ARBITRATION #1 (81r.15 Ch^r): stroke-first adjudication ran FOR Ch-class there, AGAINST it here.
3. **VARIANT** — **△ B/substance: L2 ⟨and|one⟩ before "Griffith" — DUAL RETAINED, and-leaning, vs baselines' "one"**: the third graph carries a tall d-class back-loop closely matching the same-image "and" comparators (L4; the hand's terminal-e is consistently small), but grammar favors "one" ("one Griffith" = "a certain Griffith") — the stroke-lean runs AGAINST the sense-pull, so the guard cuts both ways and the dual holds at lean across 6 sightings. Substance-class IF "and"; disclosed, unresolved — flagged for user review and #27 witness collation.
4. **CONFLICT** — **△△ D/apparatus: ¶6 terminator — MS BARE, baselines print "/"**: no virgule after execuc⟨o⟩n (L17) at nat + eB + native crop_l. Second instance of the omitted-terminator class (cf. 82r.20 "tryall"). All other expected terminators confirmed.
5. **VARIANT** — **A/form: L15 "vpon" vs baselines' "uppon"**: angular v-initial + SINGLE p-descender, FIRM (nat ×2 + eB ×2 + native) — same line as the TOP token, sighted at every layer.
6. **CONVERGENCE** — **A/form: the baselines' brackets track the MS instance-by-instance: L23 Judg^mt COMPACT exactly where they bracket "Judg[men]t"; L20 "Judgment" FULL exactly where they print full; L22 "averement" FULL where printed full. Their bracket apparatus marks real MS abbreviation — credibility point for both baselines.**
7. **NEW** — **A/form: SILENT (unbracketed) expansions at L24: MS writes ⟨Ch⟩auncell^r (suspension bar riding ABOVE the x-height bodies, cutting only the ll ascenders — NOT a strike; q-82v-b CLOSED FIRM at eB + native) and averem^t. (compact + raised t + point); baselines print "Chauncellor"/"averement" with no brackets — contrast their bracketed "Judg[men]t" one line up. Form-class only; no arbitration (no strike emerged). The body superscript-r joins the ARBITRATION #1 comparator set (cf. caption Ch^r 81r.15).**
8. **NEW** — **D/apparatus: nature, (L19) — comma-form NOT printed by baselines. FIRM** (eB + native ×2; low short mark, atlas comma class 82r.24/.5). Two further LEAN low marks disclosed only (no firm claims): post-"Murder" L4 ⟨,⟩ (native-sighted) · post-"bill" L9 ⟨point|spot⟩.

9. **CONFIRM** — **D/apparatus: 60 sheets, (L10)** — the MS comma matches the baselines' printed comma. **FIRM** (eB + native). Also 30^{li} superscript money form = baselines' "30li [£30]", no point (instance variation vs 81r's 20.^{li}).
10. **NEW** — **D/apparatus: pause-virgule after "Aprice" (L1), FIRM** — a distinct slash between name and "received", not printed by baselines; third virgule function (cf. 82r.17 paired pause-virgules).
11. **STRUCTURE** — **D/apparatus: 82v ¶ layout is MIXED: ¶4 ends MID-LINE and ¶5 opens on the SAME line** (L9, FIRM at native) — 82r's all-line-broken pattern does NOT generalize; every other boundary is line-broken with a gap. ¶ count 10 = baselines.
12. **CONFIRM** — **D/apparatus: catchword system orderly at both junctions:** 82r foot That (FIRM unstruck) completed by 82v.1 "That William" — junction CLOSED; 82v foot that lowercase UNSTRUCK FIRM (nat ×2 + eB) → 83r.1 "that will charge...", matching both baselines' catchword note. 81r's struck ~~William~~ remains the system's lone anomaly.
13. **CONFIRM** — **A/form small set, conforming:** "Aprice" one-unit single-p ×1 (82r.14's A⟨p⟩price variance stays isolated — ARBITRATION #3 unchanged) · "Juftice Barkers" spelled-out office token #3 (ARBITRATION #1 comparator, nat+eB+native) · mid-line ampersands #3/#4 where baselines print "&" (open-oval allograph — atlas) · "Comon"/"examined"/"examinacon" all PLAIN (no macrons), conforming.
14. **NEW** — **A/form minor: tall-J ⟨J⟩gnorantly (L13) vs baselines' lowercase "ignorantly"** (case class; the hand carries both forms — lowercase "ignorant" L27 same side). L27 also confirms NO trailing punctuation after "Lawe": companion exact; the Notes' trailing "—" is presentational apparatus only.
